PREGIS LAUNCHES ASTRO-BUBBLE® GREEN, FIRST AIR-CUSHIONING BUBBLE WITH UP TO 40% RECYCLED CONTENT

Deerfield, Ill., July 15, 2008—Pregis Corp. is launching Astro-Bubble® Green, the first-ever air-cushioning bubble to contain up to 40% recycled content, but no less than 30% (depending on post- and pre-consumer waste material supply availability).

Astro-Bubble® Green has been engineered to incorporate high levels of post-consumer recycled (PCR) content without losing product integrity (such as air retention within the bubble). The air cushioning bubble is made from up to 20% post-consumer recycled (PCR) content and up to 20% industrial scrap. Additionally, an organic green dye is used to create a transparent visual cue that the product is an environmentally-conscious alternative.

“At Pregis, we are committed to providing our customers with environmentally-responsible products and practices. We believe that recycling post-consumer waste is a crucial step in achieving sustainability goals and we have worked hard toward securing a supply source for this product line,” says Josephine Lee, marketing director, Pregis Protective Packaging North America.

Ideally suited as a surface cover and void-fill, the new air-cushioning bubble product line protects fragile items via both coextruded, linear-low density polyethylene (LLDPE)/nylon and monolayer LLDPE alternatives. Additionally, four different bubble sizes (ranging from 1/8- to 1/2-inch diameter) are available in both coex and monolayer to

address a wide variety of packing requirements. (Both lines are also available in standard and economy grades, depending on the desired thickness of the bubble material.)

Pregis' Astro-Bubble® Green air cushioning offers a smart, lightweight, clean and flexible option to other protective packaging alternatives. Market segments targeted by the product line include: aerospace, agriculture/produce, automotive, doors/building material, electronics/appliances, food, fulfillment/mail order, furniture, glass/china, industrial equipment/supplies, jewelry, medical, military/government, moving and storage, pharmaceuticals, publishing, retail and transportation.

About Pregis:

Pregis Corporation is a leading global provider of innovative protective, flexible, and foodservice packaging and hospital supply products. The company offers packaging and product solutions for a wide variety of consumer and industrial market segments including food and foodservice, healthcare, agriculture, automotive, furniture, electronics, construction, fulfillment, catalog and military/aerospace. The specialty-packaging leader currently operates 47 facilities in 18 countries around the world. For more information about Pregis, visit www.pregis.com.
