PREGIS' INTELLIPACK FOAM-IN-PLACE OPERATIONS MOVE TO LARGER MANUFACTURING FACILITY

Deerfield, Ill., July 14, 2010—Pregis Corp. has moved its IntelliPack foam-in-place (FIP) operations to a new, larger facility in Tulsa, Okla. The move is being made to accommodate increased demand for the company's state-of-the-art FIP equipment.

"We acquired IntelliPack earlier this year because we believe in the brand's cutting-edge technology, service platform and knowledgeable staff. In a very short period of time, we have been able to integrate the product line into the Pregis portfolio, which has increased exposure for IntelliPack's superior foam-in-place capability. Increased demand for its value added technical solutions has led the way to a rise in sales," said Kevin Baudhuin, president, Pregis Protective Packaging North America.

The move also will enable all IntelliPack operations to be housed under one roof—manufacturing, package design lab, distributor/customer training and showroom. Previously, the functions had been split into two Tulsa locations.

"Pregis already has had a tremendous impact on turning IntelliPack into a world-class manufacturing operation. The company has taken IntelliPack's unique foam-in-place technology and injected industrial engineers and lean manufacturing consultants to make sure that we create an infrastructure that produces superior equipment in an efficient and cost-effective manner," explains Todd Hanna, vice president and general manager of Pregis' FIP systems.

About IntelliPack

Since 2003, Pregis' IntelliPack brand has been instrumental in offering the marketplace new technology for a wide variety of foam-in-place (void-fill, cushioning or block/brace) applications. With more than 1,000 installations across the United States, the business unit was the first-to-market with value-added technical solutions such as telemetry and bar coding. IntelliPack's software and advanced processes have been instrumental in minimizing downtime and creating source reduction. For more information: www.intellipack.com.
