**NEW PREGIS GEOSPEED™ 100 SYSTEM DELIVERS EXCEPTIONALLY FLEXIBLE AND
ECO-FRIENDLY PACKAGING MATERIAL**

DEERFIELD, Ill. (Oct. 15, 2007) – Pregis Corporation introduces the new GeoSpeed 100 System, an exceptionally fast, user-friendly system designed for maximum packaging flexibility.

“Delivering crumpled, recyclable, renewable and biodegradable kraft paper at variable speeds of up to 70 inches per second, Pregis’ GeoSpeed 100 System is an outstanding solution for those customers who seek a highly flexible, low-cost packaging solution,” says Tom Wetsch, vice president of product development at Pregis. “The system is uniquely suited for a wide range of industries.”

Whether customers need to ship products that require a material adaptable for large and small voids, or items that are environmentally sensitive, sharp, oiled or are hard to package, Pregis’ GeoSpeed 100 System is the ideal product. Paper packaging material from this system is tightly crumpled and suited for void-fill, cushioning, wrapping and blocking and bracing applications.

With maximum versatility in mind, Pregis designed the GeoSpeed 100 System to dispense custom lengths or continuous on-demand cushioning to help customers realize greater productivity and efficiency. The material is much more efficient than hand crumpling or loose-fill packaging.

Pregis’ GeoSpeed eliminates the need to handle and store traditional packaging, allowing paper cushioning to be made on site, on demand. Due to high-quality paper and precision engineering, the GeoSpeed 100 packaging material outperforms alternative paper systems for compression strength and product protection.

About Pregis Corporation

Pregis Corporation is a leading global provider of innovative, protective and flexible packaging products, including those for food and hospital applications. The specialty-packaging leader currently operates 45 facilities in 18 countries around the world. Pregis Corporation is a wholly owned subsidiary of Pregis Holding II Corporation. For more information about Pregis, visit the company’s Web site, www.pregis.com.
