

## HEXACOMB : SFI CERTIFIED

Upon successful completion of an independent, third-party audit, Pregis qualifies to use the SFI "Certified Sourcing" logo on all Hexacomb products produced with paper from SFI Certified Participants (SFI certified participating paper suppliers).

- The acronym SFI stands for "Sustainable Forestry Initiative" and refer to an environmental organization that provides certification to companies like Pregis to use in the marketing of qualifying products.

**SUSTAINABLE FORESTRY INITIATIVE**

*Good for you. Good for our forests.™*

- Pregis' use of the SFI logo communicates that the paper used to make Pregis Hexacomb products comes from forests that are grown and harvested in an environmentally sustainable manner.
- Pregis' sourcing practices are certified by an independent third-party organization to be in compliance with the SFI environmental program.
- More than 135 million acres in North America are certified to the Sustainable Forestry Initiative®. And with SFI's rigorous environmental standards, choosing SFI helps these forests stay healthy and thriving.

## SUSTAINABLE FORESTRY INITIATIVE

*Good for you. Good for our forests.™*

### WHAT IS FOREST CERTIFICATION?

Forest Certification is a voluntary process to manage forest lands and promote sustainable forest management through principles, criteria and objectives consistent with government processes around the world.

It began in the 1990s in response to concerns about logging practices and forest conversion, especially in tropical regions.

### SFI CERTIFICATION AND YOU.

Pregis Hexacomb welcomes the opportunity to collaborate with our customers to achieve results that enhance efficiency and sustainability. We work with our suppliers to source product components that are recycled, renewable and promote the use of sustainable forest initiatives.

Pregis is the only North American manufacturer of both plastic and paper protective packaging products. Our state-of-the-art design centers create innovative, value-added solutions that drive cost and product life-cycle efficiencies for the entire supply chain.

### HEXACOMB FEATURES

Made with SFI-certified all natural, renewable virgin and post consumer recycled fibers, Hexacomb is an all natural alternative over petroleum-based plastic products.

- Hexacomb offers excellent strength, superior cushioning and blocking/bracing functions for a wide range of protective packaging applications.
- It is the lightweight, sustainable solution whether the need is shipping valuable, fragile materials or for applications that demand uncompromised strength.
- Hexacomb 100% paper-based product is made from renewable resources (a minimum of 20% recycled fiber content) and is recyclable to provide the perfect blend of performance and environmental responsibility.
- Its main raw material composition, paper, alleviates dependence on petroleum-based products and aids in the preservation of precious fossil fuels (used to manufacture plastic packaging alternatives).
