## The Simple Self-Sealing Corrugated Shipper

Looking for a quick, simple and protective way to ship a variety of goods?

Mailer-Box is a self-sealing corrugated shipper that offers more protection than standard mailers without the cost and set up time of boxes. Mailer-Box comes in 3 easy to use sizes, to allow for quick, simple and protective packaging for a wide variety of goods.

Mailer-Box features a cohesive coating that helps lock the contents safely inside while the corrugated scoring creates a package profile for bend and crush resistance. Additionally, the easy-open tear strip creates an overall positive customer experience. Save time, save money and boost operational efficiency with Mailer-Box.

### How to make a Mailer-Box:

- 

**1** Center your product on one side of the cohesive material
- 

**2** Fold over the other side of material and align the edges
- 

**3** Pull out the edge in the scored spine area to flatten for better seal
- 

**4** Starting with the top, seal the 3 open ends together (simple finger pressure or a sealing tool is enough to provide a secure seal)
- 

**5** The package is now ready for labeling and shipping

### Features:

- Edge profile creates box like structure
- Thick outer liner provides solid puncture resistance
- Easy open tear strip for improved customer experience
- Self-sealing attributes eliminate need for tape and void fill
- Easy set up for improved packaging speeds
- Recyclable
