

# How does packaging FIT into your workstation?

New AirSpeed® FIT™ from Pregis fits your operation & your budget!

A simple, economical inflation system producing air pillows and wrappable void fill packaging.

Designed with the omni-channel retailer in mind, the easy-to-operate AirSpeed® Fit™ is ideal for compact packing stations.

- Ideal for ship-from-store (SFS) applications where space is at a premium
- Great replacement for traditional void fill as well as ½ inch bubble – affordable and a fraction of the required storage space
- Reliable, simple packaging material that protects items to their final destination
- Worker ergonomics and space are maximized
- Fits into tight spaces; can be mounted directly onto racking
- No training required. Simple, out of the box operation. Just plug and go!

Create a consistent and positive customer experience by pairing with higher volume inflatable systems within your distribution center operations.

Produces both air pillows and wrappable void-fill packaging!

Place individual or a series of air pillows into empty spaces or voids in the shipping container to help protect your product in transit.

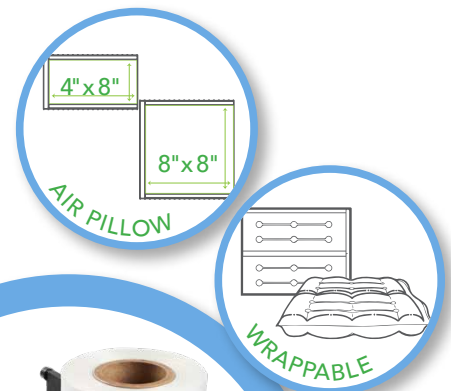

**Air Pillows sizes:** 8 x 4 inches or 8 x 8 inches

**Wrappable void fill:** Quilted design cradles the product forming a protective cushion

All options come in 1,000 foot rolls

**Machine Specifications:**

- Dimensions: 11" L x 13" W x 9" H
- Weight: 15 lbs.
- Standard wall outlet 100-240 VAC
- Speed: 18 feet per minute
- Optional collection bins and remote footswitch

# How does packaging FIT into your workstation?
