

AIR SPEED[®] HCVERSA[™] VALUE PROPOSITION

Pregis' hybrid cushioning is a high performance inflatable protective packaging solution produced on the AirSpeed HC Versa system. The hybrid cushioning film is inflated forming a proprietary pattern of squares pillows that provide superior product protection and reduces material consumption. The square pattern prevents items from damage or "bottoming out." The aesthetics of the packaging material provides a very positive experience for customers as the clean, transparent look is preferred among consumer oriented companies.

Versatile: Multiple film choices to maximize performance

- Three cushion heights: Small ($\frac{3}{4}$ "), Medium (1") and Large (1 $\frac{1}{4}$ ")
- Three cushion widths: 12" , 18" and 24" inflated
- Formulations: Performance Plus, Performance, Standard, HC Flex[™] and Renew[™]

Simplicity: Easy to load and operate with a simple start/stop operator interface

Speed: On-demand performance with the fastest machine on the market

High Yield: Proprietary pattern and registered perforation reduces material consumption

Compact Profile: Enables easy placement and flexibility for tight work areas

Delivery Systems: Compatible with wide range of ergonomic solutions

Sustainable:

- Material source reduction vs. alternative materials, and all films  are 100% recyclable. (where accepted)
- HC Renew[™] film contains bio-additive to accelerate breakdown.

UNIQUE FILM DESIGNED TO MEET DISTINCT DEMANDS

The AirSpeed HC Versa uses an innovative, specially engineered, high performance film to deliver end-user results. Made from low density polyethylene, the film is 100% recyclable (where available) and promotes environmental responsibility through proper disposal channels.

AirSpeed HC Hybrid Cushioning film

- Multiple film choices to maximize performance: Performance Plus, Performance, Standard, HC Flex and Renew.
- Excellent film clarity and configuration.
- High yield configurations provide reduced material consumption.
- Proprietary pattern prevents items from damage or "bottoming out".
- Engineered for strong, resilient seals and to resist puncturing.
- Lightweight packaging medium to reduce freight cost.
- Rolls of film provide a space saving alternative to other packaging materials.
- Recyclable as category #4. (where accepted)

Special Formulations:*

Renew: Includes a **natural, organic bio-additive to accelerate the breakdown** of the film. Available with a green tint to provide a visual cue for the sustainable properties

Anti-Static: Includes an additive to **prevent static interference** when protecting electronics or other sensitive equipment. Film will have a pink tint to indicate its anti-static properties.

*Select film grades are available in Renew or Anti-Static film formulations.

HC FILM IS IDEAL FOR A WIDE RANGE OF PACKAGING APPLICATIONS

Cushioning

Wrapping

Blocking/Bracing

Void Fill
