

A Safety Data Sheet is not legally required for this product under the OSHA Hazard Communication Standard (29 CFR 1910.1200). The following information is provided as a courtesy service to our customers.

#### **SECTION 1: IDENTIFICATION**

#### **Product identifier**

Trade name: AirSpeed® EP-Flex™ and EP-Flex Renew™

Synonym(s): Polyethylene "Air Pillow" Film

Preparation/Revision date: 6 March 2015

Relevant identified uses of the substance or mixture and uses advised against

Identified uses: Protective packaging - Inflatable cushioning product

Uses advised against: None known

### Details of the supplier of the safety data sheet

Manufacturer / Supplier

Company name: Pregis Innovative Packaging, Inc.
Address: 1650 Lake Cook Road, Suite 400

Deerfield, IL 60015

Customer service: 1-877-692-6163

**Emergency telephone number** For product and additional safety information:

e-Mail: gallen@pregis.com

**24-Hour Emergency Contact:** Chemtrec: (800) 424-9300

#### **SECTION 2: HAZARDS IDENTIFICATION**

Classification of the substance or mixture Not regulated per OSHA Hazard Communication Standard 29 CFR

1910.1200.

This product conforms to the U.S. OSHA Hazard Communication Standard's definition of an "Article," i.e., "...a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical, and does not pose a physical hazard or health risk to employees.

### Section 2: Hazards Identification (cont'd)

Preparation Date: 6 March 2015 Page 1 of 11

#### **Label elements**

Contains: None Hazard pictogram: None Signal word: None Hazard statement: None

Precautionary statements:

- Prevention: None - Response: None - Storage: None - Disposal: None Supplemental label information: None

Other hazards None

#### **Hazard summary**

Physical hazards: Not classified for physical hazards. Health hazards: Not classified for health hazards.

Environmental hazards: Not classified for hazards to the environment.

Main symptoms: Inhalation of processing fumes may cause upper respiratory irritation.

Polyethylene dust from grinding/pulverizing operations is considered nuisance

dust.

### SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS

This product conforms to the U.S. OSHA Hazard Communication Standard's definition of an "Article," i.e., "...a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical, and does not pose a physical hazard or health risk to employees."

### **SECTION 4: FIRST AID MEASURES**

**General Information** Show this Safety Data Sheet to the medical professional in attendance.

> Adverse health effects are not anticipated with use of this product as intended. If symptoms occur, follow first aid measures as appropriate.

SECTION 4: FIRST AID MEASURES (CONT'D)

Preparation Date: 6 March 2015 Page 2 of 11

**Description of first aid measures** 

Inhalation: If symptoms are experienced, move victim to fresh air, if symptoms

persist, obtain medical attention.

Skin contact: Get medical attention if irritation develops or persists. If molten material

contacts the skin, immediately flush with large amounts of water to cool the affected tissue and polymer. Do not attempt to peel polymer from

skin. Get medical attention immediately.

Eye contact: Wash eyes with clean low-pressure water. If irritation persists, seek

medical advice.

Ingestion: If gastric irritation or discomfort persists, seek medical advice.

Notes to Physician: None specified

Most important symptoms and effects, both acute and delayed

Inhalation of processing fumes may cause upper respiratory irritation. Polyethylene dust from grinding / pulverizing operations is considered nuisance dust. No known chronic health effects. No known health conditions are aggravated by exposure to this material under normal

conditions of intended use.

Indication of any immediate medical attention and special

treatment needed

None known

#### **SECTION 5: FIRE FIGHTING MEASURES**

General fire hazards This material will burn if exposed to open ignition source. Polymer will

burn but does not ignite readily. Fire gives rise to thick, black, toxic

smoke composed primarily of oxides of carbon.

**Extinguishing Media** 

Suitable extinguishing media: Use extinguishing media appropriate for surrounding material. SMALL

FIRE: Use DRY chemicals, CO<sub>2</sub>, or water spray. LARGE FIRE: Use liberal

amounts of water spray.

Unsuitable extinguishing media: None known

Special hazards arising from the

substance or mixture

Carbon monoxide, olefinic and paraffinic compounds, trace amounts of

organic acids, ketones, aldehydes and alcohols may be formed.

#### Section 5: Fire Fighting Measures (cont'd)

# Advice for firefighters

AirSpeed® EP-Flex and EP-Flex Renew

Preparation Date: 6 March 2015 Page 3 of 11

Special protective equipment for firefighters: Wear a NIOSH-approved positive pressure self-contained breathing

apparatus and firefighter turnout gear.

Special firefighting procedures: Use flooding quantities of water until well after fire is out.

Special remarks on fire hazards: Dust may form explosive mixtures with air.

### **SECTION 6: ACCIDENTAL RELEASE MEASURES**

Personal precautions, protective equipment and emergency procedures

Protective clothing is not required under normal conditions of intended use, however, the use of gloves and safety glasses is consistent with good manufacturing and hygienic practice.

Methods and materials for containing and cleaning up

No special measures necessary beyond general housekeeping. Pick up and retaining material for recycling or disposal. Do not flush spilled

material to sewer or the environment.

#### **SECTION 7: HANDLING AND STORAGE**

**Precautions for safe handling**Keep material off walking surfaces, materials may create slipping hazard.

Polymer dust generated by aggressive handling methods may form explosive mixtures with air. Avoid accumulation of dust in enclosed space. Use in well-ventilated area. Ground and bond equipment to

prevent electrostatic charge when transferring product.

Conditions for safe storage, including any incompatibilities

Keep container dry. Store away from extreme heat and away from

strong oxidizing agents. Keep containers closed to prevent

contamination.

### SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

#### **United States. Occupational Exposure Limits**

Polyethylene: Nuisance dust TWA 10 mg/m3 total (ACGIH), Nuisance dust TWA 3 mg/m3 respirable (ACGIH)

Nuisance dust PEL 15 mg/m3 total (OSHA), Nuisance dust PEL 5 mg/m3 respirable (OSHA)

#### Section 8: Exposure Controls / Personal Protection (cont'd)

**Appropriate engineering controls**If user operations generate dust, fumes or mist, use ventilation to

maintain ambient airborne contaminants below recommended

occupational exposure limits.

Preparation Date: 6 March 2015 Page 4 of 11

### **Individual Protective Measures**

General Information: Personal protective equipment should be chosen according to applicable

standards and in consultation with the supplier of the personal

protective equipment. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking

and/or smoking. Routinely wash work clothing and protective

equipment to remove contaminants.

Eye/face protection: Wear safety glasses.

Skin protection: Protective clothing such as long sleeves or a lab coat should be worn.

When handling heated material, also be sure to use heat-resistant

gloves, boots and face protection.

Respiratory protection: Appropriate respiratory protection where atmosphere exceeds

occupational exposure limits.

Thermal hazards: If possibility of contact with molten material exists, appropriate heat-

resistant garments should be worn.

Preparation Date: 6 March 2015 Page 5 of 11

### **SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES**

## Information on basic physical and chemical properties

Form	Solid flexible film	Explosive properties	Not applicable
Color	Clear, translucent, or cloudy	Explosive limit	Not applicable
Odor	No data available	Vapor pressure	Not applicable
Odor threshold	Not applicable	Vapor density	Not applicable
рН	Not applicable	Evaporation rate	Not applicable
Melting/freezing point	266°F	Relative density	~0.92-0.98
Boiling point, initial boiling	Not applicable	Partition coefficient	Not applicable
point and boiling range		(n-octanol/water)	
Flash point	Not applicable	Solubility (water)	Insoluble in water
Auto-ignition temperature	Not applicable	Decomposition temperature	No data available.
Flammability (solid, gas)	Will burn but does not ignite readily	Bulk density	Not applicable
Flammability limit-lower%	Not applicable	Viscosity	Not applicable
Flammability limit-upper%	Not applicable	VOC (weight %)	Not applicable
Oxidizing properties	Not applicable	Percent volatile	Not applicable

### **SECTION 10: STABILITY AND REACTIVITY**

**Reactivity** The product is stable and non-reactive under normal conditions of use,

storage and transport.

**Chemical stability** Material is stable under normal conditions.

**Possibility of hazardous reactions**Hazardous polymerization will not occur.

**Conditions to avoid** Avoid contact with strong oxidizers, excessive heat, sparks or open flame.

**Incompatible materials** Material may be softened by some hydrocarbons. Reacts with fluorine

gas.

Hazardous decompositions products

Under normal conditions, this material will not decompose to form

hazardous products. In case of fire, Carbon monoxide, olefinic and paraffinic compounds, trace amounts of organic acids, ketones,

aldehydes and alcohols may be formed.

Preparation Date: 6 March 2015 Page 6 of 11

### **SECTION 11: TOXICOLOGICAL INFORMATION**

#### General information on likely routes of exposure

Ingestion: No adverse effects known to be associated with ingestion of small

amounts of this inert polymer material. Ingestion of large quantities

may result in gastrointestinal discomfort or distress.

Inhalation: Adverse health effects due to inhalation are not anticipated under

normal conditions of intended use. Fumes from overheating or combustion of polymer may cause respiratory irritation. Inhalation of dust may cause respiratory irritation. Polyethylene dust from grinding and pulverizing operations is considered nuisance dust.

Skin contact: Adverse health effects due to skin contact are not anticipated under

normal conditions of intended use. Contact with molten polymer product

may cause burns.

Eye contact: Adverse health effects due to eye contact are not anticipated under

normal conditions of intended use.

Symptoms: No adverse health effects are anticipated under normal conditions of

intended use.

#### 11.1 Information on toxicological effects

Acute Toxicity: Rats inhaling polyethylene DUST developed mild inflammatory changes

in the lungs. Prolonged inhalation of thermal degradation products from polyethylene caused neurological effects in rats. Animal studies showed no adverse health effects on the digestive system when fed up to 20%

polyethylene.

Serious Eye Damage/Irritation: No data were identified for this product.

Skin corrosion/Irritation: No skin effects are expected from polyethylene contact.

Respiratory/Skin Sensitization: No skin effects are expected from polyethylene contact.

Germ Cell Mutagenicity: No data were identified for this product.

Carcinogenicity: IARC has listed polyethylene as a Group 3 substance (unclassifiable or

probably non-carcinogenic).

Reproductive Toxicity: No reproductive or developmental effects are expected. Developmental Effects: No reproductive or developmental effects are expected.

STOT – Single Exposure: No data were identified for this product.

STOT – Repeated Exposure: Subchronic, 50-90 day, feeding studies conducted on rats, dogs and

swine showed no effects from dietary levels of 1 to 20% powdered and

shredded polyethylene.

Aspiration Hazard: Not relevant based on physical form of the product.

Preparation Date: 6 March 2015 Page 7 of 11

## SECTION 11: TOXICOLOGICAL INFORMATION (CONT'D)

**Conclusion/Summary**This product is not expected to produce toxic effects.

**SECTION 12: ECOLOGICAL INFORMATION** 

**Ecotoxicity** Ecotoxicity is expected to be low based on the low water solubility of

polymers. Materials can be harmful to birds and fish if ingested.

Persistence and degradability No data available.

**Bioaccumulative potential**Not expected to occur.

**Mobility** No data available.

**Results of PBT and vPvB assessment**No data available.

Other adverse effects None known.

**Conclusion/Summary** This product is not classified as hazardous to the environment.

#### **SECTION 13: DISPOSAL CONSIDERATIONS**

#### Waste treatment methods

Residual waste: Dispose as normal, non-hazardous, solid waste, in accordance with

applicable Federal, State and Local regulations.

Contaminated packaging: Dispose as normal, non-hazardous, solid waste, in accordance with

applicable Federal, State and Local regulations.

Disposal methods/information: This material is NOT classified as a Hazardous Material by RCRA. Dispose

as normal, non-hazardous, solid waste, in accordance with applicable

Federal, State and Local regulations.

### **SECTION 14: TRANSPORT INFORMATION**

**UN Number** Not applicable, not regulated as hazardous for transport.

**UN proper shipping name**Not applicable, not regulated as hazardous for transport.

AirSpeed® EP-Flex and EP-Flex Renew

Preparation Date: 6 March 2015 Page 8 of 11

## SECTION 14: TRANSPORT INFORMATION (CONT'D)

**Transport hazard class(es)**Not applicable, not regulated as hazardous for transport.

**Packing group**Not applicable, not regulated as hazardous for transport.

**Environmental hazards** Not applicable, not regulated as hazardous for transport.

**Special precautions for user**Not applicable, not regulated as hazardous for transport.

Transport in bulk according to Annex II MARPOL73/78 and the IBC

**Code** Not applicable, not regulated as hazardous for transport.

The transport regulation may vary based on the country of use. Check for the appropriate regulations in the country of transport or usage of this product.

### **SECTION 15: REGULATORY INFORMATION**

## Safety, health and environmental regulations/legislation specific for the substance or mixture

### **USA Federal Regulations**

29 CFR 1910.1200 Hazard Communication

Standard (HCS):

California Proposition 65:

TSCA:

Not regulated

No warning needed

Exempt/Compliant

CERCLA: No reportable quantities

SARA Title III – 311/312: No components present subject to the reporting requirements.

SARA 313 This product contains no "toxic chemicals" above threshold levels

**USA State Regulations** None known

Preparation Date: 6 March 2015 Page 9 of 11

#### Section 15: Regulatory Information (cont'd)

### **Other Regulations**

All shipping mailer packaging and packaging components, manufactured in the United States by Pregis Innovative Packaging, Inc., comply with the several United States' enacted provisions of the Coalition of Northeast Governors ("CONEG") legislative model for the reduction of toxics in packaging and the California Toxics in Packaging Prevention Act. Pregis Innovative Packaging, Inc.'s manufacturing practices prohibit the intentional introduction of cadmium(Cd), hexavalent chromium(Cr +6), lead (Pb), or mercury (Hg) into its products' formulations. Further, the cumulative total of all such metals' incidental concentrations does not exceed 100 parts per million (ppm).
