

A-Series Converter Grade Film Solutions

Pregis Films offers a variety of high-quality blown film solutions to serve as a critical layer of your flexible packaging application. Our A Series coextruded sealant polyethylene films are optimized for stand-up pouches, and wicketed bags, respectively.

Standard Coex Lamination Sealant Film

A100/A101 Features:

A100 and A101 are treated, coextruded structures designed for laminations where excellent heat seal properties are required. Incorporates a high level of stiffness and clarity.

Typical applications:

Vertical or Horizontal
Form, Fill, Seal Bags
Stand Up Pouches
Laminated Structures

Standard Surface Printed Unsupported Polyethylene Film

A103 Features:

A103 is a treated, coextruded structure designed for surface print applications where excellent heat seal properties are required. Incorporates durable tear strength and pristine clarity.

Typical applications:

Lawn & Garden bags
Single Structure Bag

Our products and services truly adhere to your business needs & timelines. Pregis Films convenient stocking programs provide JIT delivery so you can maximize your warehouse footprint by streamlining internal inventory levels.

Low Heat Seal Initiation

High Tear/Puncture Strength

Premium Clarity

Excellent Lay Flat

Consistent COF
