

PROFLEX® PROFILES VALUE PROPOSITION

ProFlex profiles provide surface and edge protection to limitless packaging applications. Able to conform to just about any product contour, ProFlex profiles are easy to use and withstand multiple impacts as well as constant vibration. They feature a chemically inert, odorless, clean, closed-cell structure with excellent resiliency, flexibility and shape memory. Since these products are non-abrasive, they are an excellent method of protecting delicate furniture, powder-coated finishes, class-A surfaces and sensitive biomedical parts.

Features and Benefits:	Results:
Clean, nonabrasive material properties.	No product scratching or marring, superb surface protection.
Maximum shock absorption and vibration dampening.	Excellent cushioning, blocking and bracing.
Flexible and resilient.	Easy to use and re-use, crushproof, non-abrasive and chemically inert.
Homogeneous LDPE 4. 	100% Recyclable.
A wide assortment of configurations and shapes.	Users choose the profile most appropriate for the application.

ProFlex profiles are available in an assortment of standard formulations, shapes and colors. They can be manufactured to meet your specific requirements, including fire retardancy, UV inhibition, static dissipation and enhanced malleability.
